

Process for Qualifying & Serving Scholars in FWPS Title I/ LAP Math

Screener

- Rank Order may be started in the spring of previous year with available data found on Baseline.
- Run i-Ready Math Diagnostic reports or view Baseline Virtual Data Wall.
- If scholars are placed in the Intervention or Urgent list from i-Ready Math, go on to the next step.

Placement

- Initial Placement Test may be administered by the Interventionist in a small group setting.
- Results provide grade-level equivalency for number sense and computation and help identify learning gaps.
- Rank order spreadsheet, district benchmarks, and collaboration conversations determine groups.

Groups and Progress Monitoring

- Urgent and Intervention students not receiving support from other departments must be served by Interventionists, who are certificated teachers.
- Scholars on Intervention or Watch list from i-Ready may be served by trained Para-educators.
- Groups should not exceed 8 scholars (ideal 6 scholars and under for maximum growth).
- Progress monitoring is completed by Interventionists using weekly assessments, formative assessments, and progress monitoring from i-Ready Math reports.

Exiting Scholars

- Scholars exit from Intervention when i-Ready Scaled Score reaches On Watch/Meeting benchmark or when scholars score at grade level.
- Collaborate with all parties involved when making decisions for next steps with scholars served by Title I / LAP.
- * *Rank order spreadsheets are updated fall, winter, and spring by Interventionist. As scholars exit the program, other scholars further up the list may move into Title I/LAP. Scholars above 60% may be served in the event that all scholars under 60% have exited or are being supported by another department.*
